+91 8722573214 | chethanseervi2004@gmail.com | [linkedin.com/in/chethxnnn](https://www.linkedin.com/in/chethxnnn) | github.com/chethxnnn

Computer Science undergraduate with a genuine interest in Artificial Intelligence and what becomes possible when AI is applied thoughtfully to real problems. Prefers learning by building, working through the architecture, the failures, and the reasoning behind every decision rather than assembling things without understanding them. Comfortable across the full stack, and increasingly focused on how intelligent systems can be designed, integrated, and made useful in production environments.

EDUCATION

Dayananda Sagar Academy of Technology and Management

B.E – Computer Science and Engineering | CGPA: **9.01**

Jun 2022 – 2026

Bangalore, Karnataka

Jnana Sweekar PU College

2nd PUC – Physics, Chemistry, Mathematics | Percentage: **96%**

Sep 2020 – 2022

Bangalore, Karnataka

TECHNICAL SKILLS

Programming: Java, C, Python | DSA, OOP, SQL

SAP Technologies: SAP UI5 Freestyle, SAP Fiori, ABAP, RAP (RESTful ABAP Programming), SAP CAP, SAP BPA, SAP CPI, SAP AI Core, OData Services

Web Technologies: HTML5, CSS3, JavaScript, React.js, Node.js, Express.js, Bootstrap, Next.js, Flask

Databases: MySQL, MongoDB Atlas

AI / ML: Vector Embeddings, FAISS, LLM Orchestration, Semantic Search, Random Forest

Developer Tools: VS Code, Eclipse, Jupyter Notebook, GitHub, SAP Gateway

WORK EXPERIENCE

KPMG India, Technology Enablement (TE), SAP Intern

Technology Enablement – SAP Intern | 6 Months

Jan 2026 – Present

Bangalore, Karnataka

Business Process Automation (BPA)

- Completed structured training in SAP BPA and build process automation, independently and as part of a team, developing RPA workflows to reduce manual effort in enterprise operations.
- Designed and deployed automation bots using low-code SAP BPA tooling, directly contributing to internal Centre of Excellence (CoE) initiatives.

ABAP, RAP & SAP UI5 Fiori

- Trained in core ABAP programming including custom reports, enhancements, BADIs, and user exits on SAP NetWeaver, and in RESTful ABAP Programming (RAP) for building OData-compliant services.
- Built responsive enterprise web applications using SAP UI5 Freestyle and Fiori design principles as part of internal CoE projects, gaining exposure to real-world enterprise UI development.

AI Use Case Project: AI-Powered SAP Assistant (Backend Developer)

- Contributed as backend developer on an internal AI use case project: a conversational assistant enabling SAP consultants to search and update Functional Specification (FS) documents and ABAP/Python code files using natural language.
- Built a Flask-based backend integrated with SAP AI Core for semantic embeddings and FAISS-based vector search, enabling cosine-similarity document retrieval far beyond keyword matching.
- Implemented AI-powered document and code rewriting features with versioning (file.py to file_v1.py) and integrated a RICEFW project tracker for real-time project visibility; full-stack deployed as a Next.js + Flask application on MongoDB Atlas.

End-to-End Client Application: FIEM Industries (Frontend Developer)

- Developed the end-to-end frontend of a supplier portal for client FIEM Industries using React.js and Node.js, building multiple modules including Delivery Schedule Tracker, GateIn/MIGO reporting, and ASN creation flows.
- Integrated the React frontend with SAP ABAP OData services, implementing OData fetch helpers with authentication headers and managing complete request-response cycles for enterprise data operations.
- Applied production-grade patterns including client-side filtering, SheetJS Excel export, value-help modals, and real-time status tracking across all modules.

Varcons Technologies, Full Stack Web Development Intern

Full Stack Web Development Intern | 2 Months

May 2024 – Jul 2024

Bangalore, Karnataka

- Developed a functional web template for Azayd IT Consulting Services, aligning with client specifications for layout, branding, and UX.
- Designed and integrated a MySQL database to collect, store, and manage user data, ensuring seamless functionality and data integrity.
- Collaborated on full-stack development implementing both frontend (HTML/CSS/JS) and backend (Node.js/Express) features to deliver a production-ready client website.

PROJECTS

EcoScore: Sustainable Lifestyle Rating

Dec 2024

Personal Project | Python, Flask, Machine Learning, Random Forest

- Built an ML-based platform predicting sustainable lifestyle ratings with personalized insights, a carbon footprint calculator, gamified challenges, and rewards to promote eco-friendly habits.
- Preprocessed and trained a Random Forest model on lifestyle indicators, achieving 85% accuracy through data cleaning, one-hot encoding, and feature normalization.
- Developed a Flask-powered backend serving 100+ users, integrating a chatbot API for real-time personalized recommendations and engagement.

MateUp: Roommate Finding Platform

Jun 2024

Personal Project | Node.js, Express.js, HTML5, CSS3, Bootstrap, MySQL, EJS

- Built a web platform for students to find compatible roommates using optimized matching algorithms and real-time interactions, managing 100+ user profiles and match histories.
- Implemented secure REST APIs with Node.js/Express.js backed by MySQL, with password hashing, encrypted communication, and session-based authentication.
- Used EJS for dynamic server-side rendering, enhancing content personalization and overall platform efficiency.

Timetable Generator

Jan 2024

Personal Project | Java

- Built a Java-based timetable automation system that schedules classes dynamically by considering room availability, teacher schedules, and course constraints.
- Designed efficient algorithms using ArrayLists and arrays to optimize room capacity and teacher availability, with conflict detection and tabular output generation.
- Implemented a user-friendly console interface with formatted tabular output and validation logic to handle edge cases such as overlapping constraints and full rooms.

CERTIFICATIONS

- Developing with SAP Build Process Automation | SAP
- Networking Basics | Cisco
- Databases and SQL for Data Science | Coursera

EXTRACURRICULAR ACTIVITIES

- Participated in the "Code Arena" hackathon at the National Level technical fest Tech Tonic.
- Volunteer at Tech Club Algosphere, supporting technical workshops and community initiatives.
- Served as School Captain at Sanmarg Central School, demonstrating leadership and organizational skills.
- Founder and content creator of 'Apna Culturez', a digital initiative preserving Rajasthani cultural heritage through visual storytelling, with 4,900+ followers across Instagram and YouTube.
